Testing and Inspections

Our specialty at FDS is providing required routine tests and inspections for fire and sprinkler systems.

Service & Repair

We repair and maintain many different types and brands of fire alarms.

Installation

FDS offers equipment installations for new construction, renovations and system additions.

The FDS staff is well trained in all aspects of the business with an average of thirteen years experience.

Our management team expertise lies in knowing the best products suited for the job, as well as being proficient in all aspects of installation and service. All are NICET certified in fire detection systems.

Our design team is proficient in CAD and is NICET certified in fire detection systems and sprinkler systems. We will assist you, your engineers or managers to design the system that best meets your needs. We work closely with local authorities and are experienced in making sure the designs meet applicable codes and regulations.

Our estimating and sales engineering team is experienced in layout and design of electronic systems and are experts at estimating labor and job cost. They are NICET certified in fire detection systems and special hazards.
